

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

The following Catalogue of Books, prepared by direction of the Committee of Management of "*The Library Association of Friends of Philadelphia*," has, at very considerable expense and labor, been especially arranged for the accommodation of persons using the Library, and in a manner calculated to afford every facility for selecting such books as may suit the respective tastes of readers, without their being compelled to search the entire Catalogue. For this purpose it has been divided into six classes, and will be found not only valuable for persons able to visit the room, but more particularly for those whose engagements or infirmities preclude this; being thus enabled to select with more ease and certainty *at home* such works as they desire to procure.

Blank leaves have also been added for the convenience of recording works hereafter introduced into the Library. The books in the room are similarly classified in separate cases, and form a valuable collection of nearly *Four thousand volumes*.

It may not be amiss to give some extracts from the last Annual Report of the Committee of Management.

After stating that the Library had been in existence *seventeen years*, it remarks:—

"For the past few years it has steadily and rapidly increased, and has now assumed an importance, as an Institution founded by, and belonging to members of the Society of Friends in this city, that is by no means insignificant, as the appreciation in which it is held by them amply corroborates.

"In consequence of the Library being closed during a portion of the year for re-arrangement, no continuous statement of the number of books taken out can be furnished, but it may be well to give the following, viz:

				To Females.	To Males.	Total.
During the First Month, Volumes loaned,				167,	157,	324,
Second do do do				186,	158,	344,
Third do do do				226,	197,	423,
Fourth do do do				231,	178,	409,
				810,	690,	1500.

Making a total in *four months only* of Fifteen Hundred Volumes.

During the year* the addition to the Library by purchases and donations, has been 407 volumes."

Extract from the Minutes,

JACOB M. ELLIS, Clerk.

Philadelphia, 1st month, 1853.

* In consequence of the re-arrangement, the year's purchases embraced a period of only about *eight months*.

¶ Explanation.—Where there are two or more numbers in the margin, without any mention of the word *volumes* following, it means there are so many *copies* of the work corresponding with those numbers respectively, as on page 5, thus: "71—81—Alfred the Great."
